Waterford Expands Use of Kurzweil and JST

Job Skill Technology, Inc. (JST, Inc.) is proud to announce that the Waterford School District has made a significant addition to its existing implementation of Kurzweil 3000, a multi-sensory software program that allows students to access curriculum in a variety of ways. The product has been well-established in the district's two High Schools and three Middle Schools. The recent purchase expands license counts in these buildings. In addition, four of the district's elementary schools are piloting Kurzweil 3000 for planned expansion to all of the elementary buildings. JST, Inc. will provide training and technical support to aid in the successful implementation. Kurzweil 3000 allows the district to better utilize its support staff and provides students with the opportunity to become more independent and more successful learners.

Job Skill Technology, Inc. is a leading solution provider of computer-based learning and educational tools for pre-kindergarten through adult learners. The company specializes in software, assessment and accountability solutions, e-learning, and hardware with special emphasis on technical support and training.

The company serves K-12 schools, alternative and adult education, state and local government, colleges and universities, correctional institutions, job training programs, corporations, and private industry.
